

## About the Job

Our mission at ClearPoint Neuro is to improve and restore quality of life to patients and their families by enabling therapies for the most complex neurological disorders. We are seeking a Quality Specialist to manage product investigations and various quality-focused responsibilities at our Irvine, CA facility. The ideal candidate will have experience in the medical device field, or another highly regulated industry, with strong technical writing skills and familiarity with root cause analysis for complex devices. We are looking for someone who is detail-oriented, thorough and eager to be hands-on.

Our team members are passionate about growth, innovation and collaboration. We are constantly striving to improve and better ourselves so that we can better help patients and their families. If you have a growth mindset and thrive in a dynamic setting, you could be a great fit for our team!

### Responsibilities for this Role

- Perform detailed and thorough product investigations
- Develop and implement test methods for product investigations
- Work with R&D and manufacturing teammates for root cause analysis
- Assess trending across product lines and facilitate implementation of corrective actions
- Support product development efforts, such product testing
- Support quality team with special projects and additional tasks
- Support continuous improvement projects, including implementation of changes to processes

### Skills and Qualifications

- 2 years of experience in medical devices or another regulated field
- Experience with root cause analysis and investigations
- Technical writing experience
- Strong work ethic and willingness to be hands-on
- This is **not** a remote position.
